Summary

Full-Stack Developer with 6+ years of specialized expertise in Laravel and Vue.js ecosystems, delivering high-performance web applications that solve complex business challenges. Transformed an educational platform from concept to 50+ active users while implementing critical payment integrations (SATIM). Combines technical leadership with multilingual capabilities (Arabic, French, English, German) to effectively bridge development teams and stakeholders.

Skills

Technical expertise:
- **Core Development:** Laravel, Vue.js 3, Nuxt.js, PHP 8, JavaScript/TypeScript
- **Frontend:** Tailwind CSS, Vuetify, Pinia, SPAs, Responsive Design, HTML5/CSS3
- **Backend:** REST APIs, WebSockets, MVC/Eloquent, MySQL/MariaDB, Database Optimization
- **DevOps & Infrastructure:** Docker, Git, CI/CD Pipelines, Linux, Apache/Nginx, Server Configuration
- **Quality Assurance:** PHPUnit, SOLID principles, OOP/Design Patterns, Code Reviews, Composer

Professional skills:
- **Project Management:** Agile/Scrum methodologies, Jira/Clickup, Technical Documentation
- **Languages**: Arabic (Native), French (C1), English (IELTS B2 Academic), German (B1 Goethe Zertifikat)

Experience

Web Developer — Beenajah, Algeria — 09/2024 - Current

- Architected and implemented complete educational platform from database design to production deployment using Laravel and Nuxt.js
- Integrated SATIM payment gateway, enabling monetization and scaling platform to 50+ active teachers
- Engineered multi-environment testing infrastructure with custom email solution, reducing hosting costs by 50%
- Led technical coordination between stakeholders and development team, ensuring milestone delivery ahead of schedule
- Designed database architecture with scalability roadmap, accommodating projected user growth without significant restructuring

Web Developer — Didata, Switzerland — 03/2024 - 09-2024

- Spearheaded complete redesign of company's core application using Vue 2 and Vuetify, transforming complex Figma wireframes into production-ready interfaces
- Collaborated within cross-functional team of 12 developers and QA specialists while adhering to Agile methodologies
- Implemented Jira workflow optimizations, increasing team development efficiency by 25%
- Delivered pixel-perfect implementations matching design specifications with 98% accuracy
- Rapidly adapted to existing codebase architecture, contributing meaningful improvements within first sprint

Web Developer — Whitebay limited, Algeria — 03/2022 - 03-2024

- Spearheaded redevelopment of accounting application, improving system performance by 40% and reducing processing time by 65%
- Migrated **WordPress site** to Vue/Laravel architecture, increasing page load speed by 60% and enhancing security protocols
- Played a pivotal role in backend management, websockets integration, and hotfix deployment. Shaped **real-time parking DB** and led streamlined dashboard and mobile app creation, showcasing full-stack expertise and synchronization.
- Collaborated on **MyteamConnect**, a Vue2 project, showcasing strong teamwork and a deep mastery of Vue.js capabilities.

Web Developer — Oomph Works, UK — 07/2021 - 10/2021

- Designed and developed both frontend and backend components of the support ticketing module within the SaaS product.
- Demonstrated strong bug-fixing capabilities across various projects encompassing both frontend and backend areas.
- Enhanced the advanced filtering functionalities in multiple modules under the guidance of two lead developers, showcasing seamless collaboration and effective teamwork.
- Initiated and autonomously managed Docker and Docker Compose for efficient containerization and deployment processes.

Web Developer — Ikey Consulting (taksit.dz), Algeria — 06/2020 - 07/2021

- Embraced **C#** as my first typed language, transitioning from PHP. Engineered dynamic web apps with **ASP.NET** & Angular.
- Leveraged **DevExpress XAF** for streamlined workflows and enhanced user experiences.
- Utilized Azure DevOps for efficient project management, merging C# and ASP.NET expertise.
- Efficiently debugged using Visual Studio, streamlining testing and coding for effective software development.

| | **Web Developer** | *(freelance), Algeria* | **02/2019 - 06/2020** |

- Swiftly progressed from intern to skilled freelancer in Laravel, Vue.js, and PHP, enabling independent projects.
- Earned a Responsive Web Design certificate from FreeCodeCamp, showcasing a commitment to modern web development practices.

| | **Web Developer** | *Edisoft, Algeria* | **02/2019 - 06/2020** |

- Designed and executed a robust web application utilizing core PHP, JavaScript, and HTML to seamlessly oversee diverse hosting packages, clientele, and financial transactions, learned how to analyze client's specifications and translate their problems into a software solution, comprehensively instructed on various SQL vulnerabilities and implemented resilient backend security measures for enhanced data protection.

Education

| **Vocational Diploma in Computer Science and Web Development** | **National Institute of Vocational Training** | *Algiers, Algeria* | **02/2017 - 09/2019** |

- Graduated with highest honors; thesis project received top rating in class.
- Developed EDISOFT web application that was implemented by the institute.

| **Second Academic Year in Mechanical Engineering** | **University Of Science And Technology Houari Boumediene** | *Algiers, Algeria* | **09/2015 - 06/2016** |

- After trying mechanical engineering briefly, I realized it wasn't my passion and made a career change.

Personal Interests

- Open Source: Former active member of USTHB's Open Minds Club, organized GNU/Linux Install Party events and promoted open-source technologies
- Continuous Learning: Currently exploring microservices architecture and cloud-native application development with practical implementations
- Technical Community: Regular participant in web development meetups and contributor to online developer forums
